RFS-1278C Remote Flake Ice Machine on B-570 Bin

## Standard Features

QuietQube® Series Remote System consists of a remote condensing unit, interconnecting refrigerant lines, ice machine head section, and ice storage unit—All ordered separately. QuietQube ice machine with RCU condensing unit is designed as a Manitowoc system and not for use with any other ice machine or remote condenser brand.

- Up to 1092 lbs (495 kg) daily ice production.
- Only 22" (55.88 cm) wide.
- Evaporator is designed for maximum quality and operating life.
- Remote, air-cooled condenser system improves efficiency and ice production, conserving energy. Manitowoc remote condenser systems effectively dissipate heat at a convenient location, indoors or outdoors, away from the ice machine. This maximizes ice-making capability and minimizes air conditioning loads by lowering the ambient air temperature at the ice machine.
- Quiet operation eliminates most noise from the refrigeration system. Promotes a relaxing atmosphere.
- Ice machine is lighter in weight to simplify installation.
- Stainless steel exterior has a clean and modern look to enhance the display in any self-serve environment.

## Warranty

- 3-year Parts.
- 2-year Labor.
- Compressor parts for 5 years and labor for 2 years.

## Ice Shape

Flake ice is small hard bits of ice ideally suited for presentation applications.
